

ALEXANDRIA. VA. TUESDAY EVENING, OCTOBER 14.

slonal district, but in all the other districts of Virginia, and of every other State in the Union should never lose sight of the fact that the republican managers know that the sectional, parties and class legislation of self as confident of re-slection by an icthe regent session of Congress has seriously creased majority, as his prospects in the close countries of his district are better than lessened their popular support, and presages their less of power, and that to retain that power they will resort to any means, no matter how unscrupulous or even desperate The detected attempts to so manipulate the census returns as to increase congressional representation in northern republican, and decrease it in southern democratic States, and to colonize close States with North Carolina negroes, are only fair samples of the infamous and ruincus crimes Messrs. Q my, Clarkson, Dudley, Huston and others will

commit, in order to retain control of the of-

fice; and money of the country. The dem-

ocrats, therefore, should be on guard at every point, and, above all, should not be deceived either by the boasts of their exuberant friends or by the apparent inactivity of their enemies. The race is not always to the strong, and the democratic managers should realize the fact that the day has passed when main strength and awkwardness win elections, and that vigilance is as necessary to secure political, as military victory. TIME AND space have not yet been com plately eliminated from the "tricks upon travelers," but that they have almost been, 1+ a fact attested by the writer of this paragraph, for, on Saturday last, he took what is

called the Royal B us L'oe train at the B. & O. depot in Washington, and four hours and twenty-four minutes thereafter was at the Jersey City whar!, opposite New York. And, besides, the train moved so smoothly, and there was such an entire absence of dust and cinders, and the waiters served lunch with such precision and order, that none of the passengers seemed to be aware of the as yet unequaled speed at which they were moving. Early railroaders wou'd be as much surprised at this performance as their predecesors, the stage coachers, were at HAEDLY had the ink of President Harri-

son's signature to the new tariff bill become dry, before the hands in the silk factory at Patterson, New Jersey, were notified of a reduction of twenty per cent. in their wages. And yet the bill referred to increased the duty on foreign made silk, which increase. the owners of the Patterson factory at once added to the price of their products; and the hands whose wages have been reduced voted at the last election under the belief instilled into them by republican speakers and writers, that a protective tariff must of necessity increase the price of labor ! But now, as thousands of years ago, the woe of men are the works of their own hands.

THE FACT that Senator Don Cameron has contributed one hundred thousand dollars to the fund with which his Senatorial colleague, Mr Quay, proposes to buy the vote of Pennsylvania for his nominee, Mr. Dalamater, next month, not only shows that his investments in mining and manufacturing industries have been made more valuable by the new tariff bill, but that he, too, has lost faith in the purity of the American ballot, and believes that popular suffrage has been so debauched that it is now always at the command of the highest bidder. No wonder Pennsylvania imposes a capitation tax and makes its payment a prerequisite of voting.

should not fall to harp upon the facts that the force bill, for which two of the three Virginia republican congressmen voted, and Transylvania University when 22 years of the other one practically did the same, by age, and entered upon the practice or medivoting to make a quorum, provides for the use of soldiers at the polle, and that should to the bar in 1847. ## FROM WASHINGTON.

[Special Correspondence of the Alexandria Gazette.] WASHINGTON, D. C., Oct. 14, 1890. Personal friends of Senator Pettigrew of 70. He was worth \$100 000. South Dakota say it is a fact that he was

diegusted with the action of some of his republican colleagues at the recent session of Congress on the tariff bill, as eight of did agree with him to vote against that bill and kill it, but nearly all broke that agreement when the roll was called, and that he now puts very little faith in the words of republican Senators. #### Letter from Norfolk. Correspondence of the ALEXANDRIA GAZETTE

NOFFOLK Va., Oct. 12 .- So great is the nterest of many of our people in land buying that I can't see, just now how much etthusiasm can be awakened in politics. I have no doubt that a large number of persons who have heretofore voted the democastic ticket, will, on account of their poeltions in the navy yard, ba silent, or vote the This is mere conjecture, abolition ticket. This is mere conjecture, because nothing is more uncertain than human nature. On the other hand, despite the general laws controlling buman nature, I am at solutely certain that there are thou sands of negro abolitionists who would gladly dispose of their votes for a pecuniary

consideration to any other party, either singly or in "blocks of five." It is a sad reflection that the elections in this country are now controlled by money. Public schools, which are supposed to supply intelligence and patriotism to the people, are absolutely impotent to prevent this evil. Indeed, if we are to judge from the effects of money on the result of elections in the land of "moral ideas" and "public schools," we would conclude that the more the masses are sent to public schools the more readily are they bought. Instead, therefore, of public schools being the salvation of the country, they seem to be a potent factor in its disintegra-

tion and downfall-"A little learning is a dengerous thing." White everybody seems to be investing in real estate a most everywhere in Virginia, it seems strange that one of the most beauti fully situated and salubrious towns in the State has been, partially at least, overlooked; viz : Alexandria. I am sure that the substan-tial attractions of that old Virginia town will ere long attract manufacturers and merchants, and without a sc-called boom it will negin to flourish and grow, to the amazement of its people. I really would like to own properly there, believing it would prove

a much better investment than in many Mr. Editor, you seem to be a good judge of human nature. I would be glad if you would tell me why a gentleman (?) who consorts with the abolition party in this State oses the power to lock another gentleman in the face? Why do they look as if they those who run as independent candidates sgainst the regular democratic nominees, looking to the abolition party for support, really appear meaner, or at least appear to

feel, as they certainly look, mesner than anybody elee. Why is it? the air is soft and balmy, land sharks are booming on the waters of uncertain specu-Wherton is preaching to thousands, vet povarty, wratchedges, drunkenness and qualid disease are as rife here as in any city I have ever visited.

Westly Keiler, "the man who was skinned alive," returned to work at Indianapolis, Ind., yesterday. His case is curious.

On Wednesday, July 30, Keller fell into a steam vat at the Indianopolis V-neer Works. He was taken out as quickly as possible, but he had been scalded from the oles of his feet to the middle of his chest. One arm was all right, but the other was blistered to the shoulder. Hugh blisters ouffed up all over the man's body, and the fluid which had exuded from the flash to fit them had been cooked to a jelly. In removing his clothes great strips of the out elde or scarf skin came off, leaving exposed the trueskin undernearb, cooked until it locked like a parboiled lobster. His toes and ankies were so blistered and swollen as to lose nearly all resemblance to human members.
